

Triple-Threat™ EFI Wet Nitrous System

Innovation, Quality, Performance and Value

AVON LAKE, OHIO – Innovation is the key to product development and design. These are just two of the factors and the motivation behind Ny-Trex's entry into the nitrous market. From the start the goal for Ny-Trex was simple - identify and eliminate the nagging issues that have plagued the nitrous industry for years while still maintaining the ultimate goal of nitrous – *to produce more horsepower!*

Ny-Trex has just introduced the next phase of nitrous innovation: The **Triple-Threat** EFI wet nitrous system. Each system includes a unique precision-machined billet aluminum **Triple-Threat** Valve solenoid system. Exclusive to Ny-Trex, this system features three integral solenoid valves combining nitrous, fuel and purge all into one compact, neat, organized, easy to install component for a clean promising a professional look. Like all Ny-Trex solenoid valves, the **Triple-Threat** Valve System is backed with a lifetime warranty.

Ny-Trex **Triple-Threat** systems deliver the power and ease of use expected from a well thought-out technically advanced nitrous system with features that insure dependable results. V8 systems include jetting to produce 50 to 150 horsepower while 4 & 6 cylinder systems provide 35 to 100 HP jetting.

Ny-Trex **Triple-Threat** systems have been thoroughly dyno-tested to deliver optimum power and ensure the safest and most reliable operation of any system available today.

Each kit is complete including tuning jets as well as a complete purge system with V-spray, liquid filled bottle gauge, T-Rex injector nozzles, powder-coated 10lb bottle with chrome Hi-Flo 660 bottle valve with integrated gauge port. For the ultimate in engine safety, a fuel pressure safety system is included to safeguard the engine from low fuel conditions that could cause damage.

Systems are easy-to-install using only the highest quality materials and components to produce the best performing, best looking and most reliable wet nitrous system available today and affordably priced. Combining quality, performance, value and innovation to produce the most complete systems in the industry, Ny-Trex is the future of nitrous.

About Design Engineering, Inc.

Design Engineering, Inc. (DEI), founded in 1995 by the late Dale Markley and based in Cleveland, Ohio, is the leading aftermarket supplier of thermal tuning, heat, sound control products and Ny-Trex nitrous systems and components sold to the motorsports, automotive, motor cycle, powersports and marine enthusiast markets. DEI offers the most effective means to improve an engine's cooling efficiency, and with it, enhance performance. For more information on DEI thermal tuning products and the SEMA award winning CryO²TM cryogenic intake system and components, visit: www.DesignEngineering.com, call 800-264-9472 or e-mail: sales@DesignEngineering.com
